

Compare the Difference

Village Green® has excellent winter colour

Village Green® has superior wear tolerance

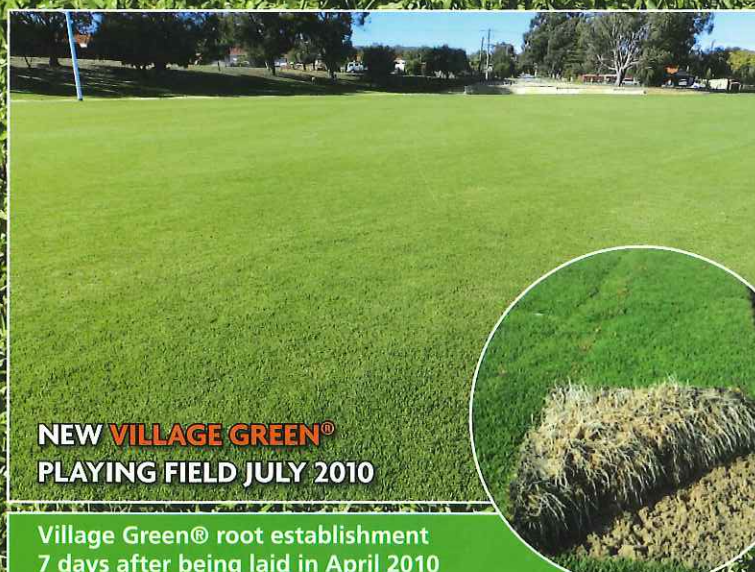

Village Green® has no unsightly male flowers and no seed

Village Green® has a massive root system for efficient nutrient and water uptake

Comparative trial work has demonstrated the advantages that Village Green® has over Common Kikuyu

	Common Kikuyu	Village Green®	Advantage of Village Green®
Total root length	450 mm	930 mm	more than double the root volume for more efficient uptake of nutrients & water
Stolon thickness	3.4 mm	4.4 mm	30% thicker stolons for greater sod strength and better survival
Internode Length	77.0 mm	43.0 mm	50% shorter internode length for higher density

Village Green is supplied by **M. COLLINS & SONS (CONTRACTORS) PTY LTD**
17 Fitzpatrick St, Revesby, NSW 2212
