Dear Matt,

Re: Environmental Monitoring – Spring Farm: Report 2020-4

Our Ref: 201019

This is to confirm that groundwater sampling and dust monitoring at Spring Farm (see Appendix 1 for sample locations) has been carried out with the results summarised in Tables 1 and 2 respectively below.

(a) Groundwater Monitoring

TABLE 1: SUMMARY OF GROUNDWATER MONITORING RESULTS.					
ANALYTE	VALUE	TARGET	DATE	TIME	TEMP
EC (uS/cm)	304 (<i>Non-Saline</i>)	< 800 uS/cm	1-4-2020	11.00 am	22°C
pH	5.65 (<i>Moderately alkaline</i>)	4 – 6.50			
Depth to Water Table (m) ¹	11.10	> 10 m			

Notes: 1. This value represents the depth to groundwater from the TOP OF THE STAND PIPE (670 mm above ground level); 2. Refer to **Appendix 2** for laboratory analysis results and monthly summary data 3 Refer to **Appendix 3** for quality control documentation.

The results indicate that groundwater is:

- *Non-saline* and is well below the nominated target of < 800uS/cm;
- *Moderately alkaline* and falls outside the nominated pH range of 4 – 6.50;
- At the limit of the target depth > 10 m.

(b) Dust Monitoring

TABLE 2: SUMMARY OF DUST DEPOSITION MONITORING RESULTS.					
SAMPLING PERIOD	LOCATION	TOTAL INSOLUBLE MATTER ¹ (G/M2/MONTH)	Ash or Mineral Content (g/m2/month)	COMMENT	EMP targets (Ash or Mineral Content)
March 2020	1	0.9	NTA	Pass	≤ 4g / m2 per month
	2	1.2	NTA	Pass	
	3	0.8	NTA	Pass	

Notes: 1.Refer to **Appendix 1** for monitoring locations. 2. Refer to **Appendix 2** for laboratory analysis results and monthly summary data. Refer to **Appendix 3** for quality control documentation.

Values at all Monitoring Stations met the EMP target levels.

Yours faithfully,

Mart Rampe BSc (Applied Geology)
Principal Consultant
